Experiences

Backend Engineer

Scud Technologies • October 2022 - Present

- Designed and developed REST APIs using Node.js and Express to power web and mobile applications.
- Integrated Prisma ORM to manage data access and improve database performance.
- Implemented Typescript for better code quality and maintainability.
- Leveraged Nest.js to build scalable and modular microservices architecture.
- Utilized web sockets for real-time communication between client and server.
- Collaborated with cross-functional teams to design and develop software features that met customer requirements.
- Developed and maintained CI/CD pipelines for continuous delivery and deployment of software products.

Tailwind CSS

FrontEnd Engineer

Stringcode Limited • January 2020 - June 2022

- Designed and developed web and mobile applications using Vue.js and React.
- Utilized Vue.js and React to build responsive and intuitive user interfaces.
- Worked closely with backend teams to integrate frontend features with REST APIs.
- Utilized Redux to manage state and improve application performance.
- Utilized Vue Router and React Router to provide smooth client-side routing and navigation.
- Developed and maintained reusable UI components and libraries to improve code efficiency.
- Utilized problem-solving skills to resolve frontend issues and improve user experience.
